Toronto² retail diesel prices in Q4 2017 were 15.2 ¢/L higher than in Q4 2016. This was the result of higher refining margins (+11.2 ¢/L), higher crude oil costs (+3.5 ¢/L) plus applicable taxes (+1.7 ¢/L), which more than offset lower retail margins (-1.2 ¢/L). Crude oil costs would have risen by 2.1 ¢/L more than they did, had it not been for a 5% increase in the value of the Canadian dollar relative to the U.S. dollar from Q4 2016 to Q4 2017. Canadian crude oil and wholesale diesel costs are affected by the CDN/US exchange rate because these commodities are traded on a North American and international basis.

Note: Retail diesel prices are affected by crude oil prices, wholesale diesel prices, and competition in the local retail diesel market. Prices vary from city to city because of differences in market size and structure, costs, and the degree of local competition.
