Toronto² retail diesel prices in Q4 2018 were 10.0 ¢/L higher than in Q4 2017. This was the result of higher wholesale margins (+16.2 ¢/L), higher retail margins (+3.6 ¢/L) plus applicable taxes (+1.1 ¢/L), offset in part by lower crude oil costs (-10.9 ¢/L). Crude oil costs would have fallen by 1.2 ¢/L more than they did, had it not been for a 4% decline in the value of the Canadian dollar relative to the U.S. dollar from Q4 2017 to Q4 2018. Canadian crude oil and wholesale diesel costs are affected by the CDN/US exchange rate because these commodities are traded on a North American and international basis

Note: Retail diesel prices are affected by crude oil prices, wholesale diesel prices, and competition in the local retail diesel market. Prices vary from city to city because of differences in market size and structure, costs, and the degree of local competition.
